

SUBSTANCE ABUSE TREATMENT FACT SHEET

Massachusetts Department of Public Health, Bureau of Substance Abuse Services

This fact sheet contains information about the impact of alcohol and other drug use in the Eighth Plymouth Representative District. Admission data were reported to the Bureau of Substance Abuse Services (BSAS) Substance Abuse Management Information System in FY 2002.

Residents of Eighth Plymouth Representative District

Characteristics of Admissions

In FY 2002, there were 124,539 admissions to licensed substance abuse treatment services in all of Massachusetts; less than one percent (645) of these admissions reside in the Eighth Plymouth Representative District. 2% (14) of admissions from the Eighth Plymouth Representative District were under 17 years of age. **Please note that these statistics represent only individual admissions, and represent a figure lower than the actual number of constituents in need of treatment services.** In FY 2002, admissions to all residential and outpatient substance abuse treatment services from the Eighth Plymouth Representative District reported the following characteristics:

- 76% were male and 24% were female.
- 59% were between the ages of 30-49.
- 89% were white non-Latino, 4% were black non-Latino, 5% were Latino, and 2% were other racial categories.
- 56% were never married, 23% were married, and 21% reported not to be married now.
- 24% had less than high school education, 51% completed high school, and 25% had more than high school education.
- 41% were employed.
- 8% were homeless.
- 29% had prior mental health treatment.

Primary Substance of Use

At admission clients also identify a “primary drug” of use that is the substance for which the client is seeking treatment. Table 1 compares the proportional distribution of primary drugs in Massachusetts with that for the Eighth Plymouth Representative District.

Table 1					
Primary Drug by District and State FY 2002					
	Alcohol	Heroin	Marijuana	Cocaine	Crack
District	63%	22%	4%	4%	2%
State	45%	37%	6%	4%	3%

Substances Used in Past Year

Upon entering treatment, each client is asked to report ALL substances used in the past year (12 months) prior to admission. Admissions frequently report using more than one substance within the year. The use of more than one psychoactive substance, such as alcohol and marijuana, is referred to as ‘polydrug’ or ‘polysubstance’ use.

Table 2 shows ALL substances which clients reported using in the year prior to admission, as well as the prevalence of injection drug users (or IDU's), individuals who use a needle to ingest cocaine, crack, heroin or another drug to get high.

Table 2 Annual Admissions by Substance Used: FY 1995 – FY 2002							
Eighth Plymouth Representative District							
	Total	Alcohol	Marijuana	Cocaine	Crack	Heroin	IDU
FY '95	390	326	95	109	58	91	52
FY '96	409	352	107	117	57	88	61
FY '97	479	398	136	111	68	116	82
FY '98	577	452	163	119	49	137	102
FY '99	535	425	169	158	66	143	103
FY '00	499	385	137	135	51	133	83
FY '01	572	428	168	170	49	177	108
FY '02	645	517	166	154	67	174	101
